TPU OUTSOLE (130°C)

If you're looking for a classic boot, that'll get the job done the old school way, this is the one for you. Modern updates to our Elastic Sided Boot include more protection and stability with our ToughSider sole design and a slip resistant TPU outsole that is oil & fat resistant. When it comes to comfort, we've layered our AirZone Comfort System with a premium polyurethane cushion midsole and an OrthoTec Lite footbed to produce a boot that delivers all-day comfort and reduces fatigue during those long days on your feet. All held together with Coats NylBond stitching, this is the best go-anywhere boot that does things without the fuss. Made in Australia. 240090 certified to AS/NZS 2210.3:2009 Class 1.
